Top nodes — security pagerank

Personalized random walk weighted by risk score · higher score = more attack paths pass through this node

1	Secret	secret-master-key	10	0.0131
2	Etcd	etcd-cluster	10	0.0116
3	Database	db-production	8.5	0.0110
4	Pod	pod-ci-runner	8.8	0.0103
5	ServiceAccount	sa-ci	7.7	0.0082
6	Role	role-pod-exec	10	0.0073
7	ClusterRole	clusterrole-admin	10	0.0064
8	Secret	secret-db-creds	10	0.0057
9	Database	db-analytics	7.1	0.0054
10	ServiceAccount	sa-backend	6.2	0.0052

Recommendation: removing permission binding **secret-master-key** eliminates **6 of 18** attack paths with a single RBAC change. Highest structural leverage in the cluster.
